Inea Automation AG

What's new!

- Re-Foundation
- The same team
- Know-how remains
- Service as before
- Spare parts remain available
- Focus on inspection
- Co-operation with InduVis

Company

New High speed Blank Sorter

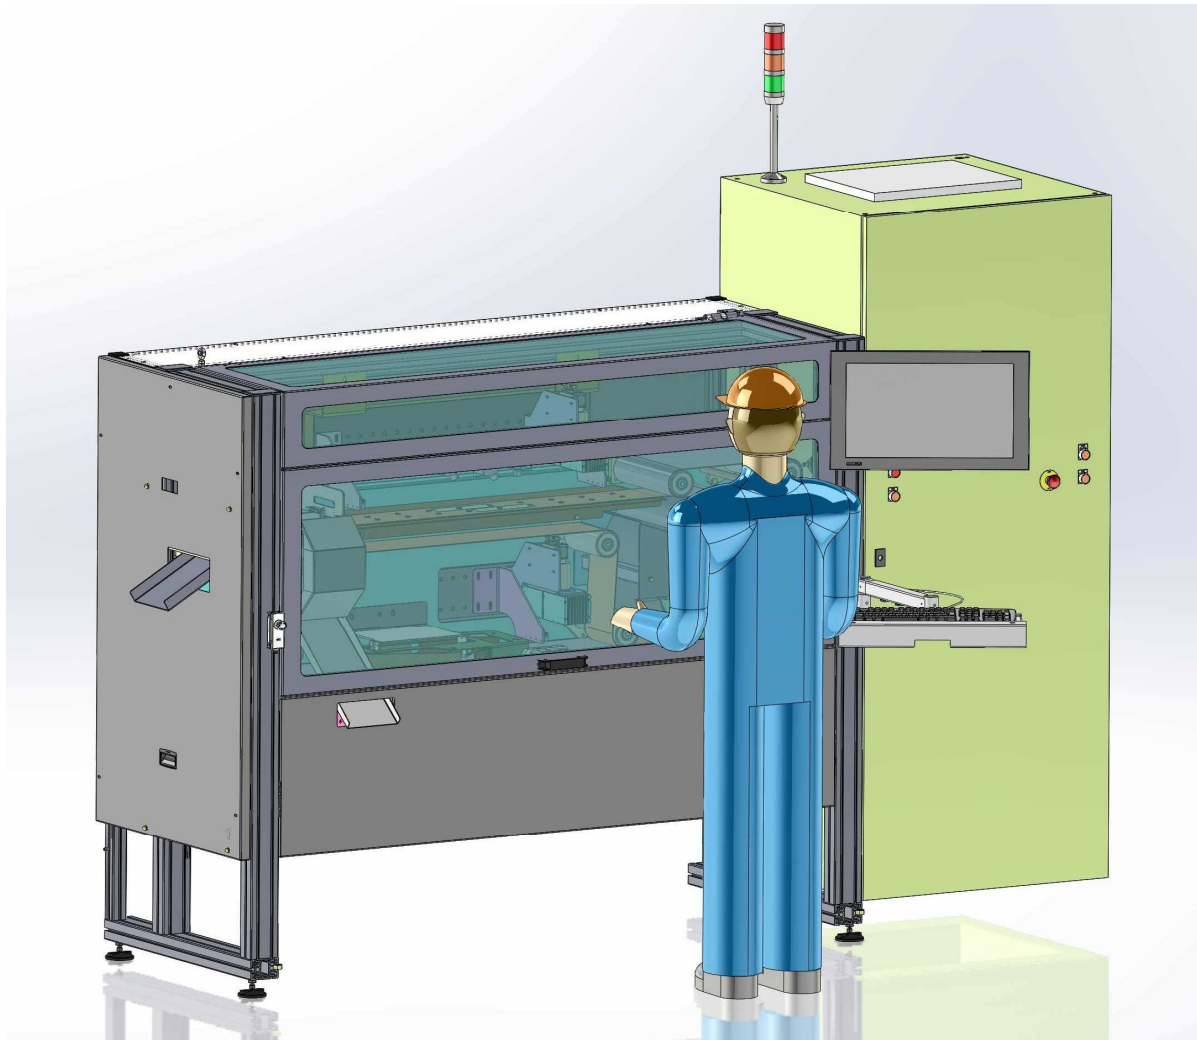

RHINO

Sorting
Machine

- High speed sorting machine
- State of the art inspection technology
- Requiring less space
- and less power consumption

The Rhino machine

Technology

Mechanical benefits

- Footprint less than 4m²
- Separation of machine and el.cabinet
- Less electrical power consumption
- No air supply required
- Proven mechanical concepts
- Low vibration for better inspection
- Two or more reject stations
- Left or right hand operation

Technology

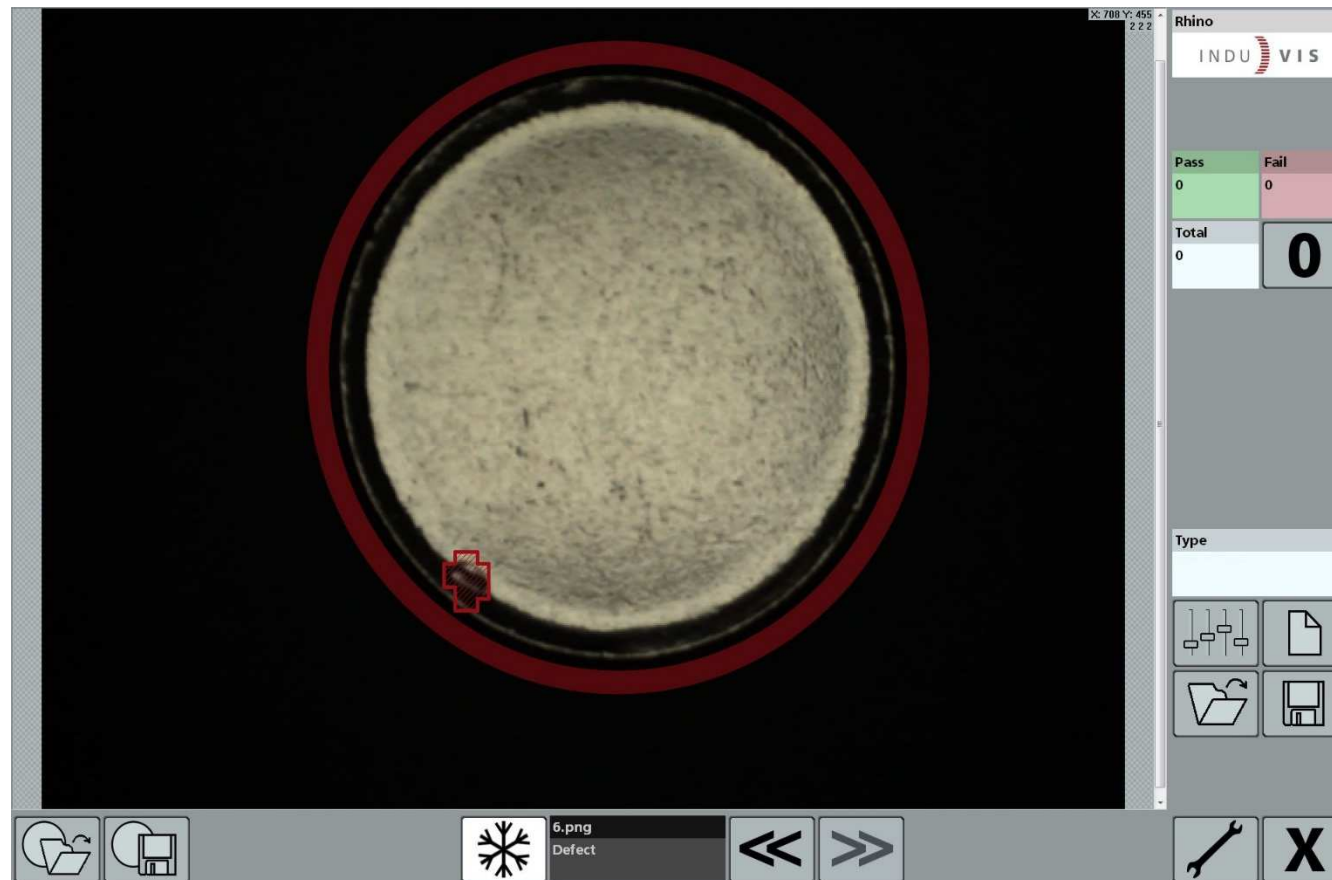

Inspection benefits

- Easy to operate system
- Modern touchscreen interface
- Easy adjustment of quality levels
- Different user levels
- Different algorithms for scratches and bubbles
- Programmable reject gates
- Less false rejects
- High resolution of dimension check
- High resolution of color check

Technology

User interface

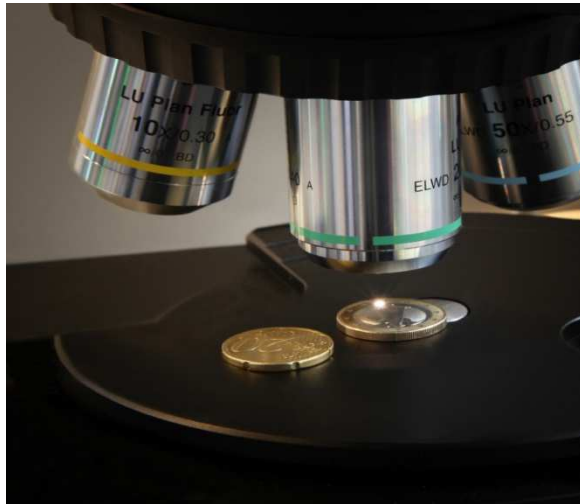

Technology

Conclusions

- **ROI within 2 years**
Less power consumption, less false rejects, easy to operate
- **Two experts within one machine**
Two market leaders combined in one sorting machine
- **Anytime upgradable**
Upgradable on 3D inspection, EMS check and more
- **Offline or inline**
System is ready to work as an offline machine or as an inline solution
